Frontend Developer
Top-Features: IMPACT, FREEDOM, DIVERSITY

We are:
... a prospering tech company developing cutting edge algorithms and user interfaces for **full text analyses**. Our Cloud Software PlagScan (SaaS) is on a mission to set THE universal **standard for plagiarism checking**, in order to enable a **fair** valuation of scientific and educational text content. Currently having a headcount of fifteen people, being easy going but downright ambitious, we are working on a product which already today helps more than **100.000 users every week**!

You are:
... looking for a **demanding and diverse** workplace, contributing to and learning a modular, **scalable** web service. The mixture of working within a tech-gene soaked team, while also being able to take **independent responsibility** is a plus for you.
You burn for thoroughly implementing consistent user interface solutions while having in mind scalability, challenges the future might bring and the end-user. You feel excited about becoming the **connecting link** between back-end and design prototypes/concepts.

Job Description:
Main task: <u>Design an amazing user experience</u>

- You don't have to know everything but must want to learn everything
- You build sustainable code (that is maintainable, extendable and performance-oriented)
