

Cloud System Architect

Top-Features: IMPACT, FREEDOM, DIVERSITY

We are:

... a prospering tech company developing cutting edge algorithms and user interfaces for **full text analyses**. Our Cloud Software PlagScan (SaaS) is on a mission to set THE universal **standard for plagiarism checking**, in order to enable a **fair** valuation of scientific and educational text content. Currently having a headcount of fifteen people, being easy going but downright ambitious, we are working on a product which already today helps more than **100.000 users every week!**

PlagScan currently operates over 30 dedicated servers with a technology stack of Debian, HA proxy, MySQL NDB cluster, tiered Gluster network storage, Yacy and Solr cloud; Nagios monitored,

You are:

...you are looking for a **demanding and diverse** workplace, contributing to and learning a modular, **scalable** web service. The mixture of working within a team, primarily soaked with the tech-gene, while also being able to take **independent responsibility** is a plus for you. Your curiosity makes you wanting to be involved in as many product matters as possible. Mindless maintenance is not your thing, but rather you **embrace** the **challenge** of adapting to new situations and developing solutions, which actually come to life by your hands!
