PlagScan

PlagScan at the ENAI Conference 2019

As Gold sponsor, the software company in Vilnius presents the Stylometry tool Author Metrics.

(COLOGNE, Germany, June 2019) - **PlagScan, an advocate of academic integrity, will participate in the 5th International ENAI Conference to be held in Vilnius, Lithuania, from June 19th to the 21st, 2019. During the event, which will focus on plagiarism in and beyond Europe as well as ethical principles in science and society, the company will present Author Metrics, our new Stylometry tool. In his keynote speech on June 21st, PlagScan CEO Markus Goldbach will show how the developed algorithm uses artificial intelligence to recognize writing style patterns and determine the author of a document based on these patterns. PlagScan has set itself the goal of improving the quality of teaching and enabling equal educational standards for all. The software is already used by 1,500 organizations worldwide.**

Using the Author Metrics stylometry tool, educators and teachers can see whether the submitted paper was written by themselves or by a ghostwriter. It allows teachers to generate additional details about specific writing style properties such as sentence length and formality. Using this data, educators and students can work together to develop their own writing style. Markus Goldbach, CEO of PlagScan, will give a keynote speech at the ENAI conference to explore the stylometry tool in more detail. The Cologne-based company is a Gold sponsor of the EU-funded education conference.
