### **PlagScan Integrates New Usage Statistics Feature: Continuous Monitoring and Evaluation of the Success of Anti-Plagiarism Measures in Education**

(COLOGNE, Germany, May 2019) - PlagScan, safeguard of Academic Integrity across the world, enables educational institutions to identify plagiarism reliably and time-efficiently. Now presenting a new feature, PlagScan has added usage statistics for organizational customers. The usage statistics feature allows all the activities within an organization to be continuously monitored. This is particularly useful for customers who want to evaluate the success of their anti-plagiarism measures through a visual presentation of data. Usage statistics are divided into different sections. In order to analyze trends and developments, it is possible to select time frames that can be viewed independently. An overview is provided in the "Organization" section, which displays the data in three different areas with different focal points - severity, documents, and usage.

#### **The base for evaluating the state of an organization's attitude towards Academic Integrity**

The new usage statistics feature is specifically tailored to the needs of organisational customers such as educational institutions. "After our customers have gained an overview of their general PlagScan usage behavior, they can also find this data for each subgroup" explains Markus Goldbach, CEO of PlagScan. On this basis, we can observe which sectors of an organization may need special optimization measures implemented. Statistics can be broken down hierarchically into groups by persons - instructors, assistants and, students - and each group can be viewed in detail. Measures such as anti-plagiarism workshops can be specifically developed for particular groups or courses, but also for an entire organization.

For more details on the technical side of PlagScan's new Statistics tool, visit our website <https://www.plagscan.com/en/statistics>. Interested members of the press, please don't hesitate to contact us either by email ([press@plagscan.com](mailto:press@plagscan.com)) or by phone +49 (0) 221 75988994.
